

THE COMPLETE SUPPLY FOR ENERGY PROVIDERS

Tools / Electrical connection technology /
Measuring, testing and safety devices

GREENLEE / KLAUKE / HDE

THE PERFECT COMBINATION FOR YOUR CONNECTIONS

For 138 years now, Klauke has invested its experience and expertise into the development of high-quality electrical connection technology, as well as reliable cutting and crimping tools. Together with Greenlee and HDE we offer **three-fold competence** and safety when testing, measuring and working in all areas of energy supply.

OPTIMALLY EQUIPPED FOR ALL ASPECTS OF ENERGY SUPPLY

With our diverse product range, we cover almost the entire value creation chain of energy supply. From energy recovery to energy distribution. From the high-voltage sector to the regional distribution by means of overhead and underground lines. From energy provisioning to supplying the private consumer.

01 ENERGY RECOVERY

02 TRANSMISSION NETWORK

01

ENERGY RECOVERY

The cable connection products from Klauke are set apart by exceptional material and crimping properties.

Customised to suit your requirements:

- Compression cable lugs
- Screw connectors
- Butt connectors
- Parallel branch clamps
- C and H-shaped clamps

02

TRANSMISSION NETWORK

The testing and measuring devices for the medium and high-voltage sector from HDE offer the highest level of safety, simple handling and reliable test results.

Convenient safety for you:

- Combination voltage and phase tester
- Voltage detectors to 500 kV
- Current measuring devices to 2000 A
- Personal voltage detectors
- Hydraulic cutting tools for cutting ACSR and Al/St wires, amongst others.

03 DISTRIBUTION STATIONS

03

DISTRIBUTION STATIONS

The battery powered hydraulic cutting tools feature impressive power transmission to the cutters and hence maximum efficiency with the cuts.

Functions for improved cutting:

- Cutting range 120 mm
- One-button operating concept
- 2-stage hydraulics

DISTRIBUTION NETWORK

The voltage tester and multimeter deliver 100% accuracy for every measuring situation.

Maximum precision at low voltage:

- Contactless voltage testing
- Two-pole voltage tester
- Digital multimeter
- Clamp multimeter

04 DISTRIBUTION NETWORK

DISTRIBUTION NETWORK

The BG-approved safety cutting systems, as well as the VDE-approved hand tools and safety accessories guarantee the maximum level of user safety.

Effortless operation even under voltage:

- Battery powered hydraulic safety cutters
- Fully insulated open-ended spanners
- Insulated stand mats
- Protective gloves

OUR SERVICE, YOUR PEACE OF MIND FOR SAFETY

Our internal Service Center in Remscheid and over 50 authorised Service Centers worldwide, with their comprehensive technical maintenance and repair service, ensure that Klauke tools and devices have maximum functional capability and guarantee secure connections.

Our range of services comprises inspecting the tools on a regular basis, checking the crimp quality through to repair work.

Because we know: Far from ending at the time of delivery, our responsibility continues with an After Sales service tailored to your day-to-day needs.

Overview of After Sales service:

- Free call tool hotline
- Direct response to your questions at a time pre-arranged to suit you
- Hire service
- Video support with live demonstration
- Service vehicle for on-site service

We look forward to being at your service whenever you need us!
